Art Unit: 1711

DETAILED ACTION

1. Claims 1-43 are withdrawn from further consideration pursuant to 37 CFR
1.142(b), as being drawn to nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper
No. 5 has been considered, however applicants' argument related to the examiner who did not restrict the claims in the instant case in the national stage of a PCT application does not have to be followed by the examiner in the instant case. And since applicant has not particularly traversed the requirement on the grounds set forth in the instant case, specifically PCT Rules 13.1 and 13.2, it is deemed that the requirement is made FINAL.

.Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 44-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stroetmann. Patentee discloses polymerization and crosslinkage of a protein such as fibrin and thereafter foams said fibrin with a gas such as carbon dioxide or nitrogen. The fact that patentee in col. 10 lines 14-23 and 37-51 states the fibrin is freeze/thawed is indicative of the fact that the fibrin contained water. The fact that applicant is calling for a kit in the instant claims without setting forth the specific means for containing said ingredients in kit form from which the foaming of the materials does not give materiality

Art Unit: 1711

Over the disclosure of the reference. In other words how is the gas and the fibrin contained within the kit?

It is deemed that the instant claims read on the disclosure of the reference.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Morton Foelak whose telephone number is (703) 308-2442. The examiner can normally be reached on Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck can be reached on (703) 308-2462. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
